

DATED: 16 MARCH 2023

TO: ALL PARTICIPANTS IN THE MOTOR INDUSTRY

NOTICE: MIBCO SERVICES TO BE AFFECTED BY THE EFF NATIONAL SHUTDOWN

Dear All,

In light of the pending shutdown as announced in various media publications scheduled for 20th March 2023, there is a risk that MIBCO's operations, and therefore the services it provides to its stakeholders, could be disrupted.

This is despite the contingency plans put in place by MIBCO to ensure continuity of operations during the planned shutdown period. The industry is encouraged to keep its request for services from MIBCO on 20th March to the absolute minimum due to the expected disruption to operations. In order not to compromise the safety of our staff and that of our members, some of our services may not be operating at 100%.

MIBCO will do its best to ensure the disruption to services is kept to the absolute minimum, and where these are not available on the day of the shutdown, MIBCO has every intention to ensure services are restored to normal as soon as it is practical to do so.

We appreciate the understanding of our members during this period of uncertainty and will endeavour to restore the services to full capacity as soon as it is practical to do so post the shutdown.

Should the need arise, updates will be issued as and when required.

Sincerely,

The MIBCO Team
